Social determinants of health and well-being among young people

HEALTH BEHAVIOUR IN SCHOOL-AGED CHILDREN (HBSC) STUDY:
INTERNATIONAL REPORT FROM THE 2009/2010 SURVEY

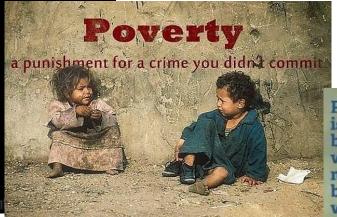

Poverty is the worst form of violence.
-Mahatma Gandhi

Poverty is not an accident. Like slavery and apartheid, it is man-made and can be removed by the actions of human beings.

Nelson Mandela

Poverty is not being without money, but being without hope.

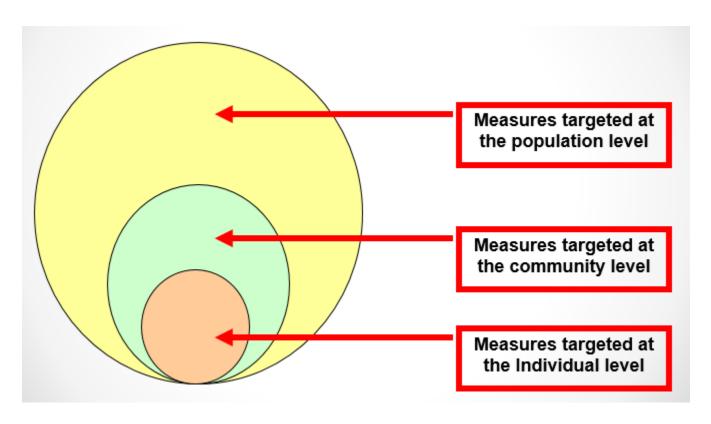

We think sometimes that poverty is only being hungry, naked and homeless. The poverty of being unwanted, unloved and uncared for is the greatest poverty. We must start in our own homes to remedy this kind of poverty.

(Mother Teresa)

#### **Community based participation and involvement**

Which helping hand will prevent a suicide?

#### THEY ALL MIGHT.

In the United States, someone dies by suicide every 17 minutes. In many cases, these deaths are preventable.

As an individual, speaking openly about suicide, knowing the warning signs and offering a helping hand could, quite literally, make the difference between life and death.

As a nation, fully implementing the National Strategy for Suicide Prevention and establishing mental health parity could help save lives.

OPENING MINDS. CHANGING POLICY. SAVING LIVES.
